

CivicSource[®] Auctioneer electronically manages every aspect of the tax sale process from registration to payment processing. Our software is implemented to meet the specific legal requirements set forth by both state and local legislation.

“The savings that we had because of Archon’s advertising for us, doing the mail-outs and then having a broader bidder base, if you will, we saved \$60,000. Anytime you save money in this business, a tax financed business, it is great for the Sheriff’s office and the Community.”

Louis Ackal,
Sheriff
Iberia Parish

Efficient and Cost Effective

With budget reductions and declining tax revenues, Taxing Authorities across the country are facing the incredibly complex task of finding ways to collect more taxes, without spending additional budgeted revenue. Archon’s CivicSource[®] Platform, which includes CivicSource[®] Auctioneer, is funded solely through a small collection fee passed on to the delinquent taxpayer.

Collaboration and Participation

Due to our targeted advertising, relationships with investment groups, and worldwide access to the Internet, CivicSource[®] Auctioneer, operating at www.civicsource.com, offers significantly higher auction participation than traditional, analog auctions on the courthouse steps. When you have thousands of people, rather than hundreds, accessing your sale, more properties are sold.

Transparent and Open

We, at Archon, are believers in the open government movement that stresses using technology to encourage more participation and collaboration within the government.

By moving the sale process online and making it universally accessible to the public, it creates an invaluable sense of transparency and efficiency in government, and eliminates the association of any perceived bias.

CivicSource[®] Auctioneer invites participants to take part in the civic process from the convenience of their own computers. For those without computers and in compliance with public access laws relative to tax sale, Archon can set up kiosks in a public or municipal building for use during the hours of the tax sale.

Internet-Based Auctions

Performing every aspect of online sales, including electronic payment processing, through our industry-standard platform, CivicSource.com.

Consulting and Drafting

Offering experienced, tax-specific consulting and legislative drafting relative to property tax collections, and specifically to 2008 ACT 819.

Interested Party Title Research

Managing every aspect of public record, tax sale, tax notice and interested party research through utilization of Professional Landmen.

Geocoded Property Mapping

Performing geocode processing on all properties allowing for users to view locations of the parcels that are up for auction on map overlays.

Customized Search Results

Offering several intuitive browsing features allowing users to search, categorize and download information on all of the properties being offered at a specific sale.

Online Payment Processing

Managing the entire payment process through an online payment portal, which accepts ACH, wire transfers, and cash.

All at no cost to you.

“We could not afford to put a system together like Archon. With all the backup they have and all of the support that they have, we couldn’t of afforded to do that. But we can afford to take part in what the expertise that they have learned. I would recommend that any Sheriff’s office at least look at this. I can’t say what’s best for any other Sheriff, but this has been best for us.”

Stephen W. Prator,
Sheriff
Caddo Parish

About Archon

We provide all political subdivisions and municipalities with comprehensive collection, online tax sale and progressive tax related solutions. Our company’s philosophy is to provide clients with the highest quality products, services, and counsel, on a timely and responsive basis, while upholding the highest ethical standards.

Revolutionizing Tax Collection.
